X Feed	GB38
End Cap	GB41

Coverplates

GBF10—for use with GB11-14  
GBF30 - for use with GB34-40

GLOBAL Trac Pulse control is a lighting track system that includes both normal input voltage and wires for transmitting the control signal to the lights. This makes it possible to use smart control systems without central units. Of these, the DALI, DMX, LON and EIB standards are the most widely known.

Various manufacturers provide control units, detectors and fixtures for the control systems. All control systems share the same goal: to transmit the control signal to individual lights using the GLOBAL Trac Pulse control's wires and to create dynamic lighting.

Dynamic lighting means that the lighting changes according to the situation and need. Lights can be turned on and off, brightened or dimmed flexibly as separate groups. This leads to energy saving as lights are only turned on where necessary.

Dynamic lighting is used to focus attention in store settings and shop windows.

It is also used in museums and exhibitions to highlight details and in restaurants, auditoriums, Hotel lobbies and many other places.

Track lengths XTS 6 (Surface) & XTSF6 (Recessed)  
Available in 1m, 2m, 3m & 4m  
White, Grey and Black
